

# Spin!

a hoop game for  
one or more players

To construct the game board, cut out the circle and arrow, glue to thin cardboard. Fasten the bulb of the arrow to the center of the circle with a pin or brad. The arrow will spin more freely if you place a washer between the board and arrow.

Spin the arrow to direct your next move. Use Spin! to play games, help you break up your usual practice, create new sequences or invent hoop moves.
